California Water Service Infrastructure Upgrade Underway to Improve Water Supply Reliability and Fire Protection in King City

KING CITY, Calif.—California Water Service (Cal Water) will complete work on a water infrastructure upgrade next month that will improve water supply reliability and fire protection in King City. The project includes the installation of 1,405 feet of new 8- and 12-inch water main in downtown King City.

“Infrastructure improvements like this help Cal Water maintain a reliable water supply for both everyday and emergency needs, and it enables us to keep providing quality, service, and value to our customers,” said Brenda Granillo, Cal Water Salinas District Manager, who currently also oversees Cal Water’s King City District.

Construction, which began in November 2024, is being performed on Broadway Street, from North Mildred Avenue to South San Lorenzo Avenue. Temporary asphalt will be applied until permanent paving is completed, which can be up to 30 days after project completion.

About California Water Service

California Water Service provides high-quality, reliable water utility services to about 16,000 people through approximately 2,800 service connections in King City, and more than 2 million people statewide through 497,700 service connections. Cal Water’s purpose is to enhance the quality of life for customers and communities. To do so, it invests responsibly in water and wastewater infrastructure, sustainability initiatives, and community well-being. The company’s 1,100+ employees live by a set of strong core values and share a commitment to protecting the planet, caring for people, and operating with the utmost integrity. The utility has been named one of “America’s Most Responsible Companies” and the “World’s Most Trustworthy Companies” by *Newsweek*, a Top Workplace, and a Great Place to Work®.
