California Water Service Group Announces Second Quarter 2014 Results

SAN JOSE, CA -- (Marketwired) -- 07/30/14 -- California Water Service Group (NYSE: CWT) today announced net income of \$17.2 million or \$0.36 per diluted common share for the second quarter of 2014, compared to net income of \$13.5 million or \$0.28 per diluted common share for the second quarter of 2013. Included in the second quarter of 2014 operating results is a \$2.5 million (or \$0.05 per diluted common share) non-recurring tax benefit.

Revenue for the second quarter of 2014 was \$158.4 million, compared to revenue of \$154.6 million in second quarter 2013, in part due to higher estimated unbilled revenue. The unbilled revenue increase resulted from higher consumption at the end of the quarter which is not included in the water revenue adjustment mechanism (WRAM).

Total operating expenses for the second quarter of 2014 increased \$1.4 million, or 1%, to \$135.1 million. Increases in water production costs, primarily purchased water cost increases, were partially offset by decreases in other operating expenses, income taxes, and property and other taxes. Maintenance expense increased \$0.8 million, or 19%, to \$5.0 million, while depreciation expense increased \$1.6 million, or 11%, to \$16.1 million due to 2014 capital additions.

Other income, net of income taxes, increased \$0.7 million in the second quarter of 2014, primarily due to an increase in unrealized gains on our benefit plan insurance investments. Interest expense decreased \$0.4 million, or 6%, to \$6.9 million due to the Company's repayment of long-term debt in 2013.

A delay in the decision on the Company's largest subsidiary's General Rate Case, filed with the California Public Utilities Commission (CPUC) in 2012, continued to impact results for the quarter. On July 21, 2014, the CPUC issued a Proposed Decision on California Water Service Company's (Cal Water) General Rate Case. The Proposed Decision will not become effective until it has been reviewed and approved by the CPUC. The Commission may adopt the proposed decision, modify it, or reject it.

Until the Proposed Decision is adopted, Cal Water will continue to track the difference between approved interim rates and new rates that are eventually adopted in a memorandum account. After new rates are implemented, the memorandum account balance will be collected through customer surcharges over 12, 24, or 36 months. Had the Commission approved the settlement proposed by the parties effective January 1, 2014, the new rates would have increased pre-tax income \$10.2 million for the six month period ended June 30, 2014. The proposed new rates would have added the following to the Company's results in 2014: \$16.1 million of pre-tax income for service charges, flat rate, and fire protection rate increases, \$1.6 million of pre-tax income from the proposed new health care balancing account, and a \$7.5 million reduction to WRAM pre-tax income.

"We are pleased to have a Proposed Decision in Cal Water's General Rate Case. We are looking forward to receiving a final decision that will allow us to recover prudently incurred costs of providing a safe, reliable water supply and earn a reasonable return on critical infrastructure investments," said President and Chief Executive Officer Martin A. Kropelnicki.

"Having this lengthy proceeding behind us will enable us to focus all of our attention on meeting our customers' need for a reliable supply of high quality water in the midst of one of the most serious droughts in the state's history," he said.

All stockholders and interested investors are invited to listen to the teleconference. The 2014 second quarter conference call may be accessed by dialing 1-888-572-7033 or 1-719-325-2491 and keying in ID# 3765528.
