2013 Earnings Guidance

California Water Service Group estimates its 2013 net income will be in the range of \$35.7 million to \$39.9 million and diluted earnings per common share to be in the range of \$0.85 to \$0.95, based on 41,980,493 shares of common stock outstanding as of March 8, 2013. As disclosed in the company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012, filed on February 28, 2013, California Water Service Company's (Cal Water's) 2013 operating revenues will be reduced by an estimated \$3.8 million, or \$0.06 per diluted common share, as required by the cost of capital adjustment mechanism associated with the noted decrease in the Moody AA utility bond index. Guidance ranges are based on assumptions and information currently available, but changes in these assumptions or other circumstances could materially impact earnings and result in earnings for 2013 significantly above or below this guidance. These estimated ranges are subject to such factors discussed below under "Forward-Looking Statements."

The company is providing earnings guidance on a one-time basis in order to highlight the impact of the non-recurring items described above on its 2012 results of operations compared to projections for 2013. In accordance with past practice, the company does not expect to provide earnings guidance in the future.

General Rate Case Update

On July 5, 2012, Cal Water filed its 2012 General Rate Case (GRC) application covering all district and general office revenue requirements in California. This rate case, which is the largest in the company's history, requested rate increases of \$92.7 million or 19.4% for 2014, \$17.2 million or 3.0% for 2015, and \$16.9 million or 2.9% for 2016. As part of the rate application, Cal Water requested authority to invest approximately \$480 million in utility plant over the rate case period. Additionally, the GRC includes a number of special requests, including the continued use of the Water Revenue Adjustment Mechanism as well as a new Healthcare Balancing Account and a true-up mechanism for the annual sales forecast, the Modified Cost Balancing Accounts, and Pension Balancing Account. The Division of Ratepayer Advocates at the California Public Utilities Commission has completed part of its review, and Cal Water is working with all parties through the normal rate case process. Cal Water expects a decision on the general rate case to be issued by the end of 2013 and have any rate changes as a result of this filing effective on January 1, 2014.
